

## Gravity Stone Balancing Class Supplies--#5477

Supplies needed (see photo below):

1. A piece of wood 18 x 7 inches, approximately
2. An old towel or a piece of foam, approximately 10 x 15 inches, approximately
3. 2 large rocks about the size of your hand, 5-6 in. thick, approximately. These should have slanted sides (see photo)
4. 2 flat rocks about 5 inches in height and width and about 1 inch thick
5. A handful of small stones to use as shims.
6. 6 to 8 flat, round stones, about 3 or 4 inches in circumference

Class Set-Up:

Clean off a table, except for your computer. Place your computer about 2 feet from where you will be working. Put the piece of wood in front of you to use as the base for your balancing. Fold the towel in front of the wood. Keep your phone in your pocket not on the table so that if your rocks fall you don't do damage! You can take it out for photos as you go along.
